INSTALLATION GUIDE

1. Download python 3 if you don't already have it (MAC ALREADY HAS PYTHON PREINSTALLED BUT IT IS STILL RECOMMENDED THAT YOU DOWNLOAD PYTHON FROM THE WEBSITE)

Mac

<https://www.python.org/ftp/python/3.8.5/python-3.8.5-macosx10.9.pkg>

Windows

64-bit: <https://www.python.org/ftp/python/3.8.5/python-3.8.5-amd64.exe>

32-bit: <https://www.python.org/ftp/python/3.8.5/python-3.8.5.exe>

Make sure to enable the "Add Python 3.8 to PATH" checkbox in the installer and click on "Disable path length limit" when the "Setup was successful" screen shows up.

Most modern systems are 64-bit but you can check if your system is 64-bit or 32-bit by following the instructions in this link to make sure that you install the right version for your system.

2. Download Pygame

Windows

Open Command Prompt and type "pip install pygame==2.0.0.dev6" (without quotes) and close the Command Prompt window after the download finishes.

Mac

Open Terminal and type "pip3 install pygame==2.0.0.dev6" (without quotes) and close the Terminal window after the download finishes.

HOW TO USE THE PROGRAM

Windows

On Windows you can simply double click on the game to play it.

Mac

On Mac, double clicking on the game will open the project in a text editor which is for editing the code. To run the game you can open terminal, type in “python3 ”, drag the game into the terminal window then press return. Make sure to add a space before dragging the game into the terminal.

TROUBLESHOOTING GUIDE

Game doesn't run

Solutions

Check that you have python installed. If you haven't installed python you can follow the installation guide

If you already have python installed make sure that the game and "roboto.ttf" is in the same folder.

Error when installing pip

If "pip install pygame==2.0.0.dev6" gives you an error you can try "pip3 install pygame==2.0.0.dev6"

Double clicking on the game in Mac opens Xcode or another text editor
